REACH responsibilities:

- Centralised structure: 2 Persons are responsible: Tony Torreele, W. Eiser
- REACH-Experts in each production plant → raw materials, regulatory affairs

Internal information exchange:

- Regular meetings and exchange of experiences: Torreele <-> Eiser
- Meetings together with all REACH experts
- Information meetings with purchasing- and/or sales department
- Face to face discussions with all interesting peoples
- Consultation of customers → letter or telephone

External information exchange:

- Communication to raw material supplier
- REACH Working group in associations → IVK
 - Exchange of experiences with competitors
 - Working out of position papers and recommendations
- Contact to international associations → EUPC (Walter Claes)
- Participation of REACH meetings and workshops BDI, VCI, UBA
- Use of Helpdesks: BDI; REACH-NET; BAUA

Paradigm shift → individual responsibility

SDS and protection measures are already existing

Skilled stuff in the industry ! Skilled stuff in authorities ?

Communication to suppliers

More transparency in all raw materials used

Knowledge about the risk of raw materials used

Support and recommendations in environment and employment protection measures

Chance and burden in finding alternative raw materials

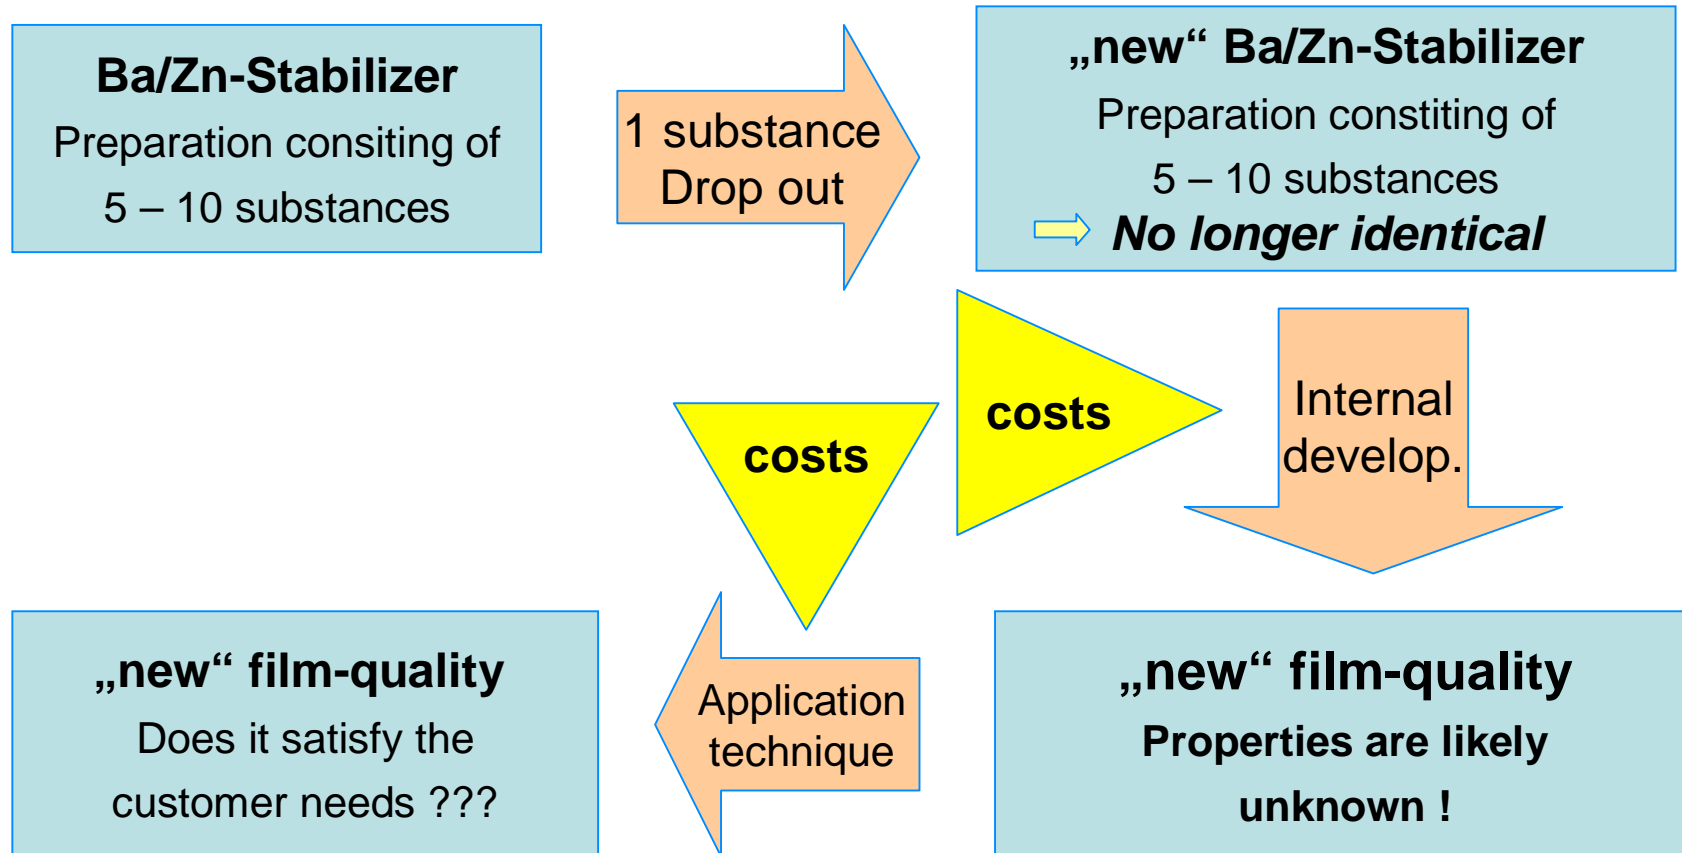

more than 4000 individual raw materials

more than 1000 active formulations

Numerous different applications partially with a long term aspect.

Worst Case Szenario

Variation of the composition of a Raw Material preparation
